STRATEGIC BRIEFING

EVOLUTION *Stables*

Redefining ownership structures in high-performance equine assets.

ES-ESNZ
FEBRUARY 2026

STRATEGIC OVERVIEW

The Digital-Syndication Difference

> We take the tried-and-tested foundation of traditional syndication and infuse it with a modern digital infrastructure. Making high-performance ownership accessible, relatable, and transparent.

Digital Onboarding

Streamlined KYC and registration protocols eliminating traditional paperwork friction.

Centralized Management

Unified reporting hub for account management and high-performance asset updates.

Automated Payments

Transparent financial processing for entry capital and operational expenditure.

Proof of Concept

Beyond Concept

The model is operational and scaling. Tangible results in the thoroughbred sector have validated the efficiency of our infrastructure.

First Gear

Our initial listing of this 4-year-old gelding proved the efficiency of the "pipes." Investors received a dividend in their first quarter of ownership.

Global Adoption

The Dubai Racing Club is now centrally implementing digital-syndication to increase ownership and participation in their region.

LISTING SCHEDULE	FY25 Q1-Q2
Prudentia	FEB 24
Hottathenafanstay	MAR 10
Turn Me Loose x Yearn	MAR 16

Regulatory Benchmark

> Operating within established financial frameworks ensures robust investor protection. Our tailored structure leverages the "Equine Exemption," balancing strict compliance with operational agility.

Authorized Syndicator

Operations adhere to standards set by New Zealand Thoroughbred Racing (NZTR) in conjunction with the Financial Markets Authority (FMA).

STATUS **NZTR COMPLIANT**

VARA Alignment

Our model aligns with Dubai's purpose-built Virtual Asset Regulatory Authority (VARA)—a global framework for digital assets.

STATUS **GLOBAL STANDARD**

Note: The Equine Exemption Advantage

This exemption allows authorized industry members to publicly offer ownership stakes without the full burden of standard FMC Act requirements. It is a tailored structure specifically designed for racing, which we aim to replicate for ESNZ.

IMPLEMENTATION STRATEGY

Four Pathways for ESNZ

01 Schedule 1 Exclusions

Utilize 'small offer' (<20 investors) or 'close business associate' rules for prototype launch.

IMMEDIATE

PROOF OF CONCEPT

02 Evolution Licensing

Individual license application to replicate the thoroughbred model for sport horses.

~30 DAYS

POST-SUBMISSION

03 Partial Relief

FMC Act compliance with specific exemptions for unworkable sections.

VARIABLE

FRICTION POINT ANALYSIS

04 Industry Class Exemption

Establish Code of Practice and seek formal class exemption (ESNZ-led).

6-18 MONTHS

PARLIAMENTARY PROCESS

NEXT STEPS

The Pilot: Low-Barrier Entry

Leveraging *FMA Schedule 1* exclusions allows for immediate deployment, bypassing the 18-month legislative timeline.

OBJECTIVE

Validate the model's efficacy within the ESNZ community via a tangible Proof of Concept.

ADVANTAGE

Evolution Stables provides the digital infrastructure; Oliver Croucher provides the bloodstock.

IMPACT

Lowers entry barriers, creating a regulated, sustainable funding pathway for Olympic aspirations.

ACTION ITEM
